

JOHNSON'S
CORNER FARM

**What do plants
need to grow?**

Agenda

A

**Plants
Need/Have/Are**

B

**The Four Things
Lesson**

C

**What do Plants
Need Worksheet**

**Plants
Need**

**Plants
Have**

**Plants
Are**

Air

Plants use air (and water and sunlight) to create their food. They also “breathe” through their leaves in order to stay cool.

Soil

Soil is the dirt, sand, or material that a plant grows in. Plants pick up nutrients from the soil.

Water

Plants use water to create their food (photosynthesis). They also use it to transport nutrients and stay cool.

Sunlight

Plants use the sun’s energy to create their food (photosynthesis).

Worksheet Instructions

**Cut out the icons from
the cutout page.**

**Paste the four correct
items onto the
worksheet.**

**Trace the word on the
worksheet.**

Plants need AIR

Plants need WATER

Plants need SOIL

Plants need SUNLIGHT

**We can't wait to
see you at the
farm!**
